

CHERUVU SHRIYA

B.Tech – Computer Science and Engineering in Data Science

shriyacheruvu@gmail.com | +91-9014083280 | github.com/shriyacheruvu | linkedin.com/in/shriyacheruvu

OBJECTIVE

Aspiring **Full-Stack Developer** and **AI Enthusiast** with a strong foundation in **Data Structures and Algorithms**, eager to contribute to production-ready web applications and innovative projects.

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science and Engineering (Data Science)

BV Raju Institute of Technology, Narsapur

CGPA: 8.31/10

2022 – Present

Senior Secondary (Class 12), State Board

FIITJEE Junior College, Hyderabad

Percentage: 93.8%

2022

Secondary (Class 10), State Board

FIITJEE World School, Hyderabad

GPA: 10/10

2020

PROJECTS

•Career Catalyst

Apr. 2025

React(TypeScript), Node.js, Flask, MongoDB

GitHub

- Designed and developed a full-stack web application, *Career Catalyst*, using **React (TypeScript)**, **Node.js**, and **Flask** to enhance student career development through **NLP-based** resume analysis and job matching.
- Integrated **Gemini API**, **Adzuna API**, and **GitHub API**, incorporating **JWT authentication** to deliver personalized skill insights and real-time job recommendations.
- Implemented **cloud-based storage (Clouinary)**, **MongoDB Atlas** for scalable data handling.

•Home Ease - Service Management System

Nov. 2024

Flask, Jinja2, HTML, Bootstrap

GitHub

- Built a web-based Service Management System using **Flask**, **Jinja2**, and **Bootstrap** for handling customer service requests with integrated form validation and CRUD operations.
- Incorporated **role-based access control (RBAC)** for Admins, Service Professionals, and Customers using **SQLAlchemy** with **SQLite**, enabling secure user verification, profile approvals, and service management.

•Currency Converter

Jan. 2024

Java, Java Swing

GitHub

- Created a **Java** desktop application for **real-time currency conversion** utilizing **REST API** (HTTP GET, JSON).
- Structured the **GUI** with **event-driven programming**, input validation, and error/exception handling.

SKILLS

- **Languages:** Java, Python, C, JavaScript
- **Backend:** Flask, Node.js, Express.js, MongoDB, SQLite
- **Frontend:** React.js, HTML, CSS, Bootstrap, Jinja2
- **Soft Skills:** Quick Learner, Effective Communicator, Collaborative
